- Large Format Scanning
  - Small Format Scanning
  - DPS ImageMaker Software
  - Other Scanning Services

Since 1991, DPS has been in business to assist you in protecting your investments and improving your Company's productivity.

## Large Format Scanning

Engineering drawings, seismic charts, well logs and other large items are scanned to a digital raster image in PDF, TIF and other formats.

Images can be scanned in black & white, grayscale or color. Images can be up to 52 inches wide on media up to 54 inches wide. Images and media can be of any length, as the scanner is continuous feed.

A typical D-size engineering drawing scanned black & white, 200 dpi, TIF G4 will be a file of about 0.4 MB. One DVD-ROM can hold about 4,700 MB (4.7 GB) of data, or about 11,750 D-size drawings.

Free testing is available for all our scanning services and free pickup and delivery is available for medium to large jobs in the Tulsa area.

Aerials  
Blueprints  
Mylars  
Sepias  
Vellum  
Others

## Small Format Scanning

"Small format" documents are typically letter (8.5"x11") and legal (8.5"x14") paper and either simplex (printed on one side of the paper) or duplex (printed on both sides of the paper). DPS scans documents from A8 (2.1"x2.9") to A3 (11.7"x17.0") and black and white, grayscale and color scans are available. Document preparation includes removing staples, stick-notes, etc. and may be done by DPS or the client.

PDF (Portable Document Format) is the most common file format. All the paper in one manila folder can be scanned into one PDF. All the paper in one four-drawer filing cabinet can fit on one CD.

Free testing is available for all our scanning services and free pickup and delivery is available for medium to large jobs in the Tulsa area.
